

Dear Sir or Madam,

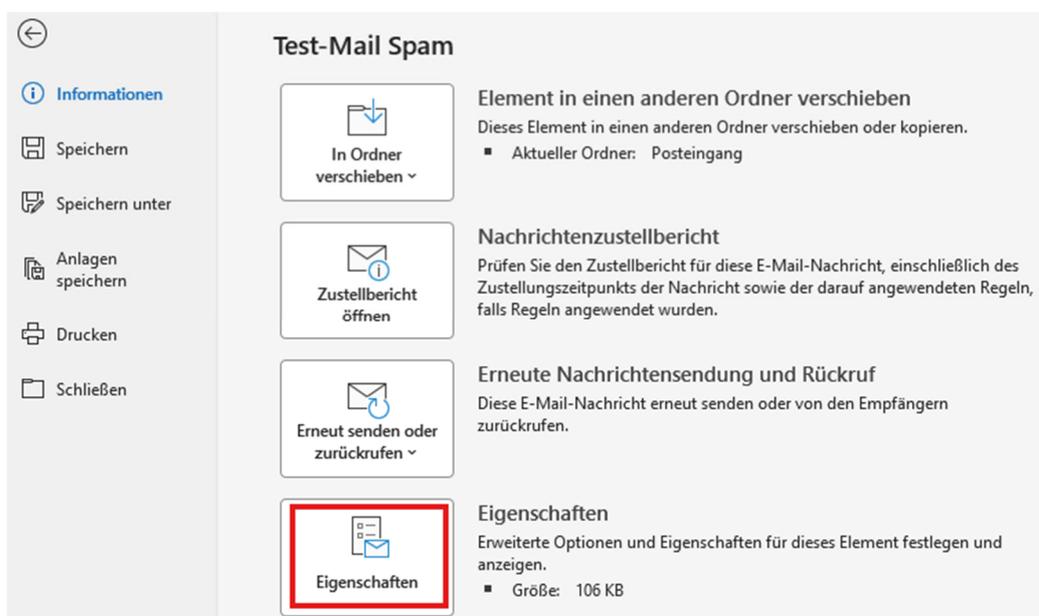

Thank you very much for reporting the spam emails sent in our name.

If you would like to help us take action against these spam emails, please send us the sender's email header so that we can better identify them:

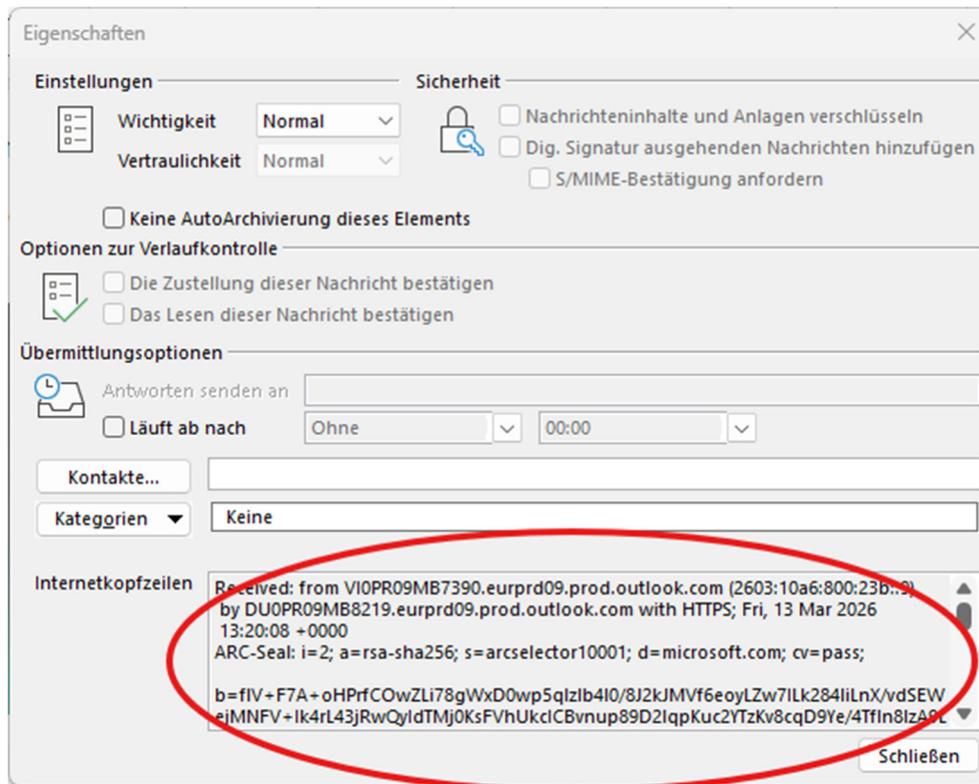

- If you use Microsoft Outlook, it's very easy to get the mail header of an incoming message.
- First you need to open the message in Outlook and afterwards click on **File** (Datei in german)

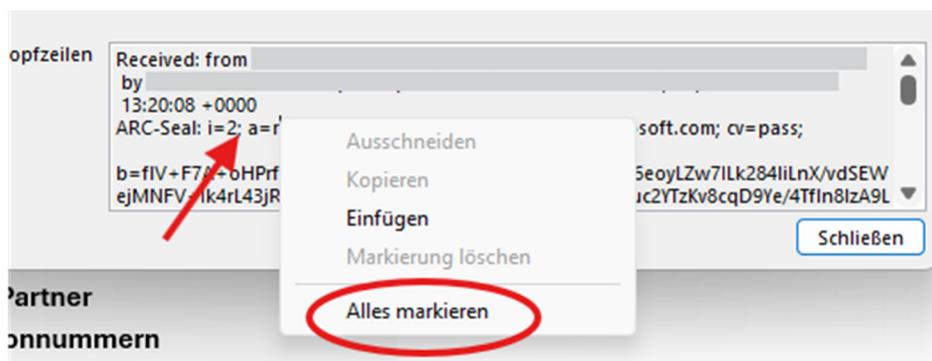

- Then click on **Properties** (Eigenschaften in german).

- Now you will see the mail header field at the bottom of the new window.

- Use the right mouse button to open the context menu and choose Mark All (Alles markieren in german)

- Then Press CTRL + C (STRG + C in german) and copy the whole text to the clipboard.
- Then you can open a new message and paste the text in the mail message area using CTRL + V (STRG + V in german).
- Send this message to our provided mail account: [lena.lueck@pahlke-schaumstoffe.de](mailto:lena.lueck@pahlke-schaumstoffe.de)

Thank you very much for your support!
